

Lighting Policy Sense of the Council Motion

Draft 3: Charlie Smyth, 5/19/08

Immediate: All current and planned city lighting projects will conform to LEED lighting standards and will use full cutoff lighting unless not possible.

Immediate: Add specific LEED Lighting standards and goals to the Sustainable Urbana Report so that the Sustainable Urbana Commission can help develop the following medium and long term goals:

Medium: Develop effective, efficient, economical and ecological lighting ordinances and policies that incorporate LEED Lighting compliance and encourage the use of low energy solutions such as LED bulbs for all future developments as well as current and future city lighting projects;

Long: As staff time permits and as the technology and city need develops, develop a multi-year phase in of energy saving, compliant lighting for all current lighting in the City of Urbana, public and private.
