Section IV-2. Purpose of Districts

R-7 University Residential

J. The Residential Districts generally are intended to provide desirable settings for residential uses within several density ranges described in Urbana's Comprehensive Plan, and for various types of dwelling units, with appropriate regulations regarding physical development. As appropriate, the districts also allow other uses compatible with residential areas, either as permitted or as conditional or special uses. Basic urban services and utilities, including adequate access and utilities, are necessary for these districts.

8. The R-7, University Residential District is intended to provide areas in proximity to the University of Illinois for dormitories and rooming houses, which are occupied primarily by students, to insure the longevity of the architectural character and use of these existing buildings, and to protect nearby low-density residential districts from incompatible developments. The R-7 district also allows some business uses within existing structures. The district is intended to encourage the adaptive re-use of existing older structures.
