## Tree Maintenance Agreement

This Tree Maintenance Agreement between The Morton Arboretum and the Recipient certifies that customary and reasonable tree care and maintenance will be **performed for three years post-planting for trees planted under the terms of the 2019 Urban and Community Forestry Grant.**

Maintenance recommendations are detailed in *International Society of Arboriculture Tree Planting Best Management Practice*.

Trees must be mulched and watered appropriately for three years to enable trees to become fully established and thrive. During the growing season, 10-15 gal or 1" of water should be applied **weekly** to the root ball of newly planted trees unless adequate soil moisture is present.

A 2"-3" layer of organic, wood chip mulch will be maintained in a circular area that is at least 3' in diameter around the base of the tree. Mulch shall not touch the trunk of the tree.

All tags, rope and wire ties will be removed. Trunk wrap may remain in place for the first winter season if necessary for thin-barked trees. Stakes will only be used in windy locations and will be removed after one year.

All trees will be monitored for pests or other signs of stress, and conditions will be remedied when appropriate and possible.

I certify that, according to the above, my organization will comply with tree maintenance requirements.
